

India packing checklist

Warm in the valley, freezing at cloudbase, and paperwork you cannot fix on the day. Six items are marked essential. Do not travel without them. Tick these boxes in any PDF reader and save, or print it and use a pen.

ALTITUDE

Billing launches at about 2,400m, and cloudbase in season is over 3,000m, where it is freezing.

CONDITIONS

The front range is forgiving; the traffic is not. Bring gear you can relax on.

IF IT GOES WRONG

Land out over the back and help can take until the next day. Carry what you need for a night out.
